Projects

- For my M.S. thesis, I created (using R, HTML and JavaScript) a website and a desktop application with graphical user interfaces that automate hypothesis testing and statistical modeling using machine learning. The goal was to make statistics accessible to non-technical users. The software is available for free at https://automated-data-analysis.shinyapps.io/automation_app/

- I published 5 research papers (link to my account on researchgate.net)
