Hazmieh, LEBANON

### BIOGRAPHY

I am a public health professional with an experience in research and analysis to support effective public health interventions. My background combines pharmacy practice with public health skills, particularly in biostatistics, epidemiology, and pharmaceutical services.

I have worked closely with diverse teams, including patients, healthcare providers, national and international organizations, to integrate various subjects and improve health outcomes. My communication skills and experience in multicultural areas allowed me to connect well with various people.

Throughout my career, I have focused on contributing to public health and pharmacy, with a commitment on improving access to essential healthcare services and supporting evidence-based health policies, always in an ethical environment.
